Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A; Molecule type: protein
A; Residues: 2-152 < ELL.>
A; Experimental source: Lincoln wool
C; Superfamily: keratin high-sulfur matrix protein IIIA
C; Keywords: acetylated amino end; duplication; hair
F; 2-152/product: keratin high-sulfur matrix protein B2C #status experimental <WAT>
F; 27-36, 37-46, 47-56/Region: duplication
F; 2/Modified site: acetylated amino end (Ala) (in mature form) #status experimental
                       Keratin high-sulfur matrix protein B2C - sheep
C;Species: Ovis orientalis aries, Ovis ammon aries (domestic sheep)

ferredoxin 2[4Fe-4S] fwdE - Methanobacterium thermoautotrophicum (strain Marburg) C; Species: Methanobacterium thermoautotrophicum C; Species: Methanobacterium thermoautotrophicum C; Date: 10-Oct-1995 #sequence_revision 17-Nov-1995 #text_change 20-Jun-2000 C; Accession: 853541; 857452 R; Hedderich, R.; Hedderich, R.; Rchohheimer, A.; Schmitz, R.A.; Thauer, R.K.; Hedderich, R. Eur. J. Biochem. 234, 910-920, 1995 A; Title: The tungsten formylmethanofuran dehydrogenase from Methanobacterium thermoau
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Keratin high-sulfur matrix protein B2B - sheep
C.Species: Ov1s orientalis aries, Ov1s ammon aries (domestic sheep)
C.Species: Ov1s orientalis aries, Ov1s ammon aries (domestic sheep)
C.Satcession: A02838
R.Elleman, T.C.; Dopheide, T.A.
J. Biol. Chem. 247, 3900-3909, 1972
A;Title: The sequence of SCMK-B2B, a high sulfur protein from wool keratin.
A;Reference number: A02838; WUID:72206034
A;Molecule type: protein
A;Residues: 1.156 < FEL.
A;Residues: 1.156 < FEL.
A;Experimental source: Lincoln wool
A;Rote: a minor component has 77-Gly
C;Comment: Most of the sequence shows a repeating pattern of 10 residues.
C;Superfamily: keratin high-sulfur matrix protein IIA
C;Superfamily: keratin high-sulfur matrix protein IIA
C;Keywords: acetylated amino end (Ala) #status experimental
                                                                                                                                                                                                          hypothetical protein C06A1.6 - Caenorhabditis elegans
C; Species: Caenorhabditis elegans
C; Species: Caenorhabditis elegans

submitted to the EMBL Data Library, December 1991
A.Description: Nucleotide sequence of a Human high-sulphur keratin cDNA.
A.Reference number: S18946
A.Mccession: S18946
A.Mccession: S18946
A.Molecule type: mRNA
A.Molecule type: RNNA

T15651
Hypothetical protein C27A2.5 - Caenorhabditis elegans
C; Species: Caenorhabditis elegans
C; Species: Caenorhabditis elegans
C; Species: 20-Sep-1999 #sequence_revision 20-Sep-1999 #text_change 20-Sep-1999
C; Accession: T15651
R; Nhan, M.
Submitted to the EMBL Data Library, May 1996
A; Description: The sequence of C. elegans cosmid C27A2.
A; Reference number: 218382
A; Reference number: 218382
A; Reciession: T15651
A; Molecule type: DNA
A; Residues: 1-188 < NHA
A; Residues: 1-188 < NHA
A; Residues: EMBL: U58760; NID: g1330384; PID: g1330389; PIDN: AAB00710.1; GSPDB: G

Protein Sci. 9:2059-2067(2000).
--- FUNCTION: Inhibitor of voltage-gated potassium channels. Blocks potassium currents by binding to Kv4.2 potassium channels.
--- TISSUE SPECIFICITY: Produced by the venomous gland.
--- TASSE SPECIFICITY: Mw=3412.72; METHOD=Electrospray.
--- SIMILARITY: BELONGS TO THE SPIDER POTASSIUM CHANNEL INHIBITORY TOXIN FAMILY.
                                                                                                                                                                                                                              Sanguinetti M.C., Johnson J.H., Hammerland L.G., Kelbaugh P.R., Volkmann R.A., Saccomano N.A., Mueller A.L.; "Heteropodatoxins: peptides isolated from spider venom that block

-!- FUNCTION: STRONG ANTIMICROBIAL ACTIVITY AGAINST E.COLI ML35P
BACTERIUM, N.CINERRA AND WEAKER AGAINST S.EPIDEMIDIS, S.AUREUS
ANS GROUP B STREPTOCOCCUS BACTERIA. ACTIVE AGAINST FUNGUS
C.ALBICANS. NO ACTIVITY AGAINST P.AERUGINOSA BACTERIUM.
-!- TISSUE SPECIFICITY: HIGHEST EXPRESSION IN LIVER AND TO A LESSER
EXTENT IN HEART AND BRAIN. LOW LEVELS IN LUNG, TONSILS, SALIVARY
GLAND, TRACHEA, PROSTATE GLAND, ADRENAL GLAND AND THYROID GLAND.
SECRETED INTO THE URINE.
